- Turbo Full Power 2.2 motor and 710Wh battery offer an unparalleled riding experience, providing a smooth, seamless, and shockingly quiet amplification of your efforts, up to 28 mph. The integrated controller responds to your pedal inputs resulting in intuitive amplification of your efforts with an incredibly natural feel.
- MasterMind and Mission Control The MasterMind display reveals all relevant info about your ride, allows real-time tuning of support levels, and enables over-the-air updates so that your bike gets better over time. MasterMind seamlessly integrates with the Mission Control app for range optimization tools, advanced tuning, on-ride diagnostics, and more.
- The enviolo AUTOMATiQ Internal Gear Hub (IGH) stepless shifting technology automatically shifts gears based on a rider's pedal pace, taking changes in the surroundings into account. By selecting a preferred cadence or pedal pace, it allows riders to "set it and forget it", adding an extra layer of safety and comfort for riders.
- Proven Smooth Efficiency We designed a custom testing mechanism to analyze bumps at even the smallest frequency to increase comfort and vision. That precision, paired with a suspended seatpost, higher volume tires, and an 80 mm suspension fork, will flatten roads before your eyes.
- Turbo System Lock Use the Mission Control app to disable your bike's motor and activate the motion sensor alarm. Once locked, the motor cannot be enabled again except by the owner.
- Garmin Radar An integrated Garmin Radar sensor lets you know when traffic is coming up behind you. Garmin's Radar technology can detect cars up to 140 meters away. MasterMind will give riders a visual, audible, and haptic alert of an approaching vehicle's relative distance and rate of speed.
- Fully Integrated Removable and Lockable Downtube Battery Easy to charge, easy to secure.
- Equipped with DRYTECH Fenders, LED front and rear lights, and 27kg capacity rear HD Rack. The rear rack is compatible with child bike seats, and the bike is also rated to pull a thru-axle trailer.

- Turbo Full Power 2.0 motor and 710Wh battery offer an unparalleled riding experience, providing a smooth, seamless, and shockingly quiet amplification of your efforts, up to 28 mph. The integrated controller responds to your pedal inputs resulting in intuitive amplification of your efforts with an incredibly natural feel.
- The stepless shifting enviolo TR Inernal Gear Hub (IGH) features a specifically
 designed internal gear hub and matching controller. The manual stepless technology
 is as simple as adjusting the volume on a radio. This allows riders to focus on the
 important aspects of a bike ride such as traffic or scenery.
- MasterMind and Mission Control The MasterMind display reveals all relevant info about your ride, allows real-time tuning of support levels, and enables over-the-air updates so that your bike gets better over time. MasterMind seamlessly integrates with the Mission Control app for range optimization tools, advanced tuning, on-ride diagnostics, and more.
- Proven Smooth Efficiency We designed a custom testing mechanism to analyze bumps at even the smallest frequency to increase comfort and vision. That precision, paired with a suspended seatpost, higher volume tires, and an 80 mm suspension fork, will flatten roads before your eyes.
- Turbo System Lock Use the Mission Control app to disable your bike's motor and activate the motion sensor alarm. Once locked, the motor cannot be enabled again except by the owner.
- Fully Integrated Removable and Lockable Downtube Battery Easy to charge, easy to secure.
- Equipped with DRYTECH Fenders, LED front and rear lights, and 27kg capacity rear HD Rack. The rear rack is compatible with child bike seats, and the bike is also rated to pull a thru-axle trailer.

- Turbo Full Power 2.0 motor and 710Wh battery offer an unparalleled riding experience, providing a smooth, seamless, and shockingly quiet amplification of your efforts, up to 28 mph. The integrated controller responds to your pedal inputs resulting in intuitive amplification of your efforts with an incredibly natural feel.
- MasterMind and Mission Control The MasterMind display reveals all relevant info about your ride, allows real-time tuning of support levels, and enables over-the-air updates so that your bike gets better over time. MasterMind seamlessly integrates with the Mission Control app for range optimization tools, advanced tuning, on-ride diagnostics, and more.
- Proven Smooth Efficiency We designed a custom testing mechanism to analyze bumps at even the smallest frequency to increase comfort and vision. That precision, paired with a suspended seatpost, higher volume tires, and an 80 mm suspension fork, will flatten roads before your eyes.
- Turbo System Lock Use the Mission Control app to disable your bike's motor and activate the motion sensor alarm. Once locked, the motor cannot be enabled again except by the owner.
- Fully Integrated Removable and Lockable Downtube Battery Easy to charge, easy to secure.
- Equipped with DRYTECH Fenders, LED front and rear lights, and 27kg capacity rear HD Rack. The rear rack is compatible with child bike seats, and the bike is also rated to pull a thru-axle trailer.

- Turbo Full Power 2.0E motor and 530Wh battery offer an unparalleled riding experience, providing a smooth, seamless, and shockingly quiet amplification of your efforts, up to 28 mph. The integrated controller responds to your pedal inputs resulting in intuitive amplification of your efforts with an incredibly natural feel.
- MasterMind and Mission Control The MasterMind display reveals all relevant info about your ride, allows real-time tuning of support levels, and enables over-the-air updates so that your bike gets better over time. MasterMind seamlessly integrates with the Mission Control app for range optimization tools, advanced tuning, on-ride diagnostics, and more.
- The stepless shifting enviolo City Internal Gear Hub (IGH) features a specifically
 designed internal gear hub and matching controller. The manual stepless technology
 is as simple as adjusting the volume on a radio. This allows riders to focus on the
 important aspects of a bike ride such as traffic or scenery.
- Proven Smooth Efficiency We designed a custom testing mechanism to analyze bumps at even the smallest frequency to increase comfort and vision. That precision, paired with a suspended seatpost, higher volume tires, and an 80 mm suspension fork, will flatten roads before your eyes.

TURBO VADO 5.0 IGH

Red Tint / Silver Reflective

White Mountains / Black Reflecitve

Cast Black / Silver Reflective

Vado is the vehicle for everything from daily commutes to fast workouts to longer-than-planned adventures-an electric bike for life. The smoothest-riding e-Bike experience yet, Vado is designed to boldly take on the ever-changing landscape you'll encounter as a daily rider, carry whatever you need it to, and keep you riding more often.

- Turbo Full Power 2.2 motor and 710Wh battery offer an unparalleled riding experience, providing a smooth, seamless, and shockingly quiet amplification of your efforts, up to 28 mph. The integrated controller responds to your pedal inputs resulting in intuitive amplification of your efforts with an incredibly natural feel.
- MasterMind and Mission Control The MasterMind display reveals all relevant info about your ride, allows real-time tuning of support levels, and enables over-the-air updates so that your bike gets better over time. MasterMind seamlessly integrates with the Mission Control app for range optimization tools, advanced tuning, on-ride diagnostics, and more.
- The enviolo AUTOMATiQ Internal Gear Hub (IGH) stepless shifting technology automatically shifts gears based on a rider's pedal pace, taking changes in the surroundings into account. By selecting a preferred cadence or pedal pace, it allows riders to "set it and forget it", adding an extra layer of safety and comfort for riders.
- Proven Smooth Efficiency We designed a custom testing mechanism to analyze bumps at even the smallest frequency to increase comfort and vision. That precision, paired with a suspended seatpost, higher volume tires, and an 80 mm suspension fork, will flatten roads before your eyes.
- Turbo System Lock Use the Mission Control app to disable your bike's motor and activate the motion sensor alarm. Once locked, the motor cannot be enabled again except by the owner.
- Garmin Radar An integrated Garmin Radar sensor lets you know when traffic is coming up behind you. Garmin's Radar technology can detect cars up to 140 meters away. MasterMind will give riders a visual, audible, and haptic alert of an approaching vehicle's relative distance and rate of speed.
- Fully Integrated Removable and Lockable Downtube Battery Easy to charge, easy to secure.
- Equipped with DRYTECH Fenders, LED front and rear lights, and 27kg capacity rear HD Rack. The rear rack is compatible with child bike seats, and the bike is also rated to pull a thru-axle trailer.

Cast Black / Silver Reflective

Vado is the vehicle for everything from daily commutes to fast workouts to longer-than-planned adventures-an electric bike for life. The smoothest-riding e-Bike experience yet, Vado is designed to boldly take on the ever-changing landscape you'll encounter as a daily rider, carry whatever you need it to, and keep you riding more often.

- Turbo Full Power 2.2 motor and 710Wh battery offer an unparalleled riding experience, providing a smooth, seamless, and shockingly quiet amplification of your efforts, up to 28 mph. The integrated controller responds to your pedal inputs resulting in intuitive amplification of your efforts with an incredibly natural feel.
- MasterMind and Mission Control The MasterMind display reveals all relevant info about your ride, allows real-time tuning of support levels, and enables over-the-air updates so that your bike gets better over time. MasterMind seamlessly integrates with the Mission Control app for range optimization tools, advanced tuning, on-ride diagnostics, and more.
- The enviolo AUTOMATiQ Internal Gear Hub (IGH) stepless shifting technology automatically shifts gears based on a rider's pedal pace, taking changes in the surroundings into account. By selecting a preferred cadence or pedal pace, it allows riders to "set it and forget it", adding an extra layer of safety and comfort for riders.
- Proven Smooth Efficiency We designed a custom testing mechanism to analyze • bumps at even the smallest frequency to increase comfort and vision. That precision, paired with a suspended seatpost, higher volume tires, and an 80 mm suspension fork, will flatten roads before your eyes.
- Turbo System Lock Use the Mission Control app to disable your bike's motor and activate the motion sensor alarm. Once locked, the motor cannot be enabled again except by the owner.
- Garmin Radar An integrated Garmin Radar sensor lets you know when traffic is • coming up behind you. Garmin's Radar technology can detect cars up to 140 meters away. MasterMind will give riders a visual, audible, and haptic alert of an approaching vehicle's relative distance and rate of speed.
- Fully Integrated Removable and Lockable Downtube Battery Easy to charge, easy • to secure.
- Equipped with DRYTECH Fenders, LED front and rear lights, and 27kg capacity rear ٠ HD Rack. The rear rack is compatible with child bike seats, and the bike is also rated to pull a thru-axle trailer.

TURBO VADO 5.0

Red Tint / Silver Reflectiv

White Mountains / Black Reflecitve

Cast Black / Silver Reflective

Vado is the vehicle for everything from daily commutes to fast workouts to longer-than-planned adventures-an electric bike for life. The smoothest-riding e-Bike experience yet, Vado is designed to boldly take on the ever-changing landscape you'll encounter as a daily rider, carry whatever you need it to, and keep you riding more often.

- Turbo Full Power 2.2 motor and 710Wh battery offer an unparalleled riding experience, providing a smooth, seamless, and shockingly quiet amplification of your efforts, up to 28 mph. The integrated controller responds to your pedal inputs resulting in intuitive amplification of your efforts with an incredibly natural feel.
- MasterMind and Mission Control The MasterMind display reveals all relevant info about your ride, allows real-time tuning of support levels, and enables over-the-air updates so that your bike gets better over time. MasterMind seamlessly integrates with the Mission Control app for range optimization tools, advanced tuning, on-ride diagnostics, and more.
- Proven Smooth Efficiency We designed a custom testing mechanism to analyze bumps at even the smallest frequency to increase comfort and vision. That precision, paired with a suspended seatpost, higher volume tires, and an 80 mm suspension fork, will flatten roads before your eyes.
- Turbo System Lock Use the Mission Control app to disable your bike's motor and activate the motion sensor alarm. Once locked, the motor cannot be enabled again except by the owner.
- Garmin Radar An integrated Garmin Radar sensor lets you know when traffic is coming up behind you. Garmin's Radar technology can detect cars up to 140 meters away. Master/Mind will give riders a visual, audible, and haptic alert of an approaching vehicle's relative distance and rate of speed.
- Fully Integrated Removable and Lockable Downtube Battery Easy to charge, easy to secure.
- Equipped with DRYTECH Fenders, LED front and rear lights, and 27kg capacity rear HD Rack. The rear rack is compatible with child bike seats, and the bike is also rated to pull a thru-axle trailer.

<u>TURBO VADO 5.0 STEP-THROUGH</u>

Red Tint / Silver Ref

White Mountains / Black Reflecitve

Cast Black / Silver Reflective

Vado is the vehicle for everything from daily commutes to fast workouts to longer-than-planned adventures-an electric bike for life. The smoothest-riding e-Bike experience yet, Vado is designed to boldly take on the ever-changing landscape you'll encounter as a daily rider, carry whatever you need it to, and keep you riding more often.

- Turbo Full Power 2.2 motor and 710Wh battery offer an unparalleled riding experience, providing a smooth, seamless, and shockingly quiet amplification of your • efforts, up to 28 mph. The integrated controller responds to your pedal inputs resulting in intuitive amplification of your efforts with an incredibly natural feel.
- MasterMind and Mission Control The MasterMind display reveals all relevant info about your ride, allows real-time tuning of support levels, and enables over-the-air updates so that your bike gets better over time. MasterMind seamlessly integrates with the Mission Control app for range optimization tools, advanced tuning, on-ride diagnostics, and more
- Proven Smooth Efficiency We designed a custom testing mechanism to analyze bumps at even the smallest frequency to increase comfort and vision. That precision, paired with a suspended seatpost, higher volume tires, and an 80 mm suspension fork, will flatten roads before your eyes.
- Turbo System Lock Use the Mission Control app to disable your bike's motor and activate the motion sensor alarm. Once locked, the motor cannot be enabled again except by the owner.
- Garmin Radar An integrated Garmin Radar sensor lets you know when traffic is coming up behind you. Garmin's Radar technology can detect cars up to 140 meters away. MasterMind will give riders a visual, audible, and haptic alert of an approaching • vehicle's relative distance and rate of speed.
- Fully Integrated Removable and Lockable Downtube Battery Easy to charge, easy • to secure
- Equipped with DRYTECH Fenders, LED front and rear lights, and 27kg capacity rear HD Rack. The rear rack is compatible with child bike seats, and the bike is also rated to pull a thru-axle trailer.

Vado is the vehicle for everything from daily commutes to fast workouts to longer-than-planned adventures-an electric bike for life. The smoothest-riding e-Bike experience yet, Vado is designed to boldly take on the ever-changing landscape you'll encounter as a daily rider, carry whatever you need it to, and keep you riding more often.

- Turbo Full Power 2.0E motor and 530Wh battery offer an unparalleled riding experience, providing a smooth, seamless, and shockingly quiet amplification of your efforts, up to 28 mph. The integrated controller responds to your pedal inputs resulting in intuitive amplification of your efforts with an incredibly natural feel.
- MasterMind and Mission Control The MasterMind display reveals all relevant info about your ride, allows real-time tuning of support levels, and enables over-the-air updates so that your bike gets better over time. MasterMind seamlessly integrates with the Mission Control app for range optimization tools, advanced tuning, on-ride diagnostics, and more.
- The stepless shifting enviolo City Internal Gear Hub (IGH) features a specifically
 designed internal gear hub and matching controller. The manual stepless technology
 is as simple as adjusting the volume on a radio. This allows riders to focus on the
 important aspects of a bike ride such as traffic or scenery.
- Proven Smooth Efficiency We designed a custom testing mechanism to analyze bumps at even the smallest frequency to increase comfort and vision. That precision, paired with a suspended seatpost, higher volume tires, and an 80 mm suspension fork, will flatten roads before your eyes.
- Turbo System Lock Use the Mission Control app to disable your bike's motor and activate the motion sensor alarm. Once locked, the motor cannot be enabled again except by the owner.

TURBO VADO 3.0 IGH STEP-THROUGH

Red Tint / Silver Reflective

White Mountains / Black Reflecitve

Cast Black / Silver Reflective

Vado is the vehicle for everything from daily commutes to fast workouts to longer-than-planned adventures-an electric bike for life. The smoothest-riding e-Bike experience yet, Vado is designed to boldly take on the ever-changing landscape you'll encounter as a daily rider, carry whatever you need it to, and keep you riding more often.

- Turbo Full Power 2.0E motor and 530Wh battery offer an unparalleled riding • experience, providing a smooth, seamless, and shockingly quiet amplification of your efforts, up to 28 mph. The integrated controller responds to your pedal inputs resulting in intuitive amplification of your efforts with an incredibly natural feel.
- MasterMind and Mission Control The MasterMind display reveals all relevant info about your ride, allows real-time tuning of support levels, and enables over-the-air updates so that your bike gets better over time. MasterMind seamlessly integrates with the Mission Control app for range optimization tools, advanced tuning, on-ride diagnostics, and more.
- The stepless shifting enviolo City Internal Gear Hub (IGH) features a specifically designed internal gear hub and matching controller. The manual stepless technology is as simple as adjusting the volume on a radio. This allows riders to focus on the important aspects of a bike ride such as traffic or scenery.
- Proven Smooth Efficiency We designed a custom testing mechanism to analyze • bumps at even the smallest frequency to increase comfort and vision. That precision, paired with a suspended seatpost, higher volume tires, and an 80 mm suspension fork, will flatten roads before your eyes.
- Turbo System Lock Use the Mission Control app to disable your bike's motor and activate the motion sensor alarm. Once locked, the motor cannot be enabled again except by the owner.
- Fully Integrated Removable and Lockable Downtube Battery Easy to charge, easy • to secure.
- Equipped with DRYTECH Fenders, LED front and rear lights, and 27kg capacity rear HD Rack. The rear rack is compatible with child bike seats, and the bike is also rated to pull a thru-axle trailer.

TURBO VADO 3.0 STEP-THROUGH

Red Tint / Silver Reflectiv

White Mountains / Black Reflecitve

Cast Black / Silver Reflective

Vado is the vehicle for everything from daily commutes to fast workouts to longer-than-planned adventures-an electric bike for life. The smoothest-riding e-Bike experience yet, Vado is designed to boldly take on the ever-changing landscape you'll encounter as a daily rider, carry whatever you need it to, and keep you riding more often.

- Turbo Full Power 2.0E motor and 530Wh battery offer an unparalleled riding experience, providing a smooth, seamless, and shockingly quiet amplification of your efforts, up to 28 mph. The integrated controller responds to your pedal inputs resulting in intuitive amplification of your efforts with an incredibly natural feel.
- MasterMind and Mission Control The MasterMind display reveals all relevant info about your ride, allows real-time tuning of support levels, and enables over-the-air updates so that your bike gets better over time. MasterMind seamlessly integrates with the Mission Control app for range optimization tools, advanced tuning, on-ride diagnostics, and more.
- Proven Smooth Efficiency We designed a custom testing mechanism to analyze bumps at even the smallest frequency to increase comfort and vision. That precision, paired with a suspended seatpost, higher volume tires, and an 80 mm suspension fork, will flatten roads before your eyes.
- Turbo System Lock Use the Mission Control app to disable your bike's motor and activate the motion sensor alarm. Once locked, the motor cannot be enabled again except by the owner.
- Fully Integrated Removable and Lockable Downtube Battery Easy to charge, easy to secure.
- Equipped with DRYTECH Fenders, LED front and rear lights, and 27kg capacity rear HD Rack. The rear rack is compatible with child bike seats, and the bike is also rated to pull a thru-axle trailer.

TURBO TERO 5.0

Red Onyx / Smoke

The new Turbo Tero is an electric mountain bike equipped for everyday rides. A mountain bike that you can commute on. A commuter you can take touring. A touring bike that you can haul freight with. Whatever you need it to be, for wherever you want to go. A true do-it-all superhero, Tero combines adaptable utility with World Champion mountain bike DNA and category-leading electric pedal assist.

- Turbo Full Power 2.2 Motor and 710 Wh Battery- Integrated into the aluminum frame
 of the Tero 5.0, they effectively quadruple your own power, cranking out ample
 wattage to make short work of the steepest climbs and providing enough extra
 muscle to let you carry a mountain of adventure gear, groceries, kids and daydreams
 without breaking a sweat. It's you, only faster. But what really sets this motor apart
 from the rest is how efficiently and seamlessly it melds with your own efforts.
- Mission Control and MasterMind- Mission Control allows you to tailor Tero's power output levels to your desired preference-all three standard power modes can be almost infinitely adjusted to suit your power and range needs. MasterMind's MicroTune function can adjust power output levels in 10% increments so that you can tune the range to suit your needs.
- Mountain Bike DNA- Tero's componentry is tailored to enhance control and confidence. Aggressive but smooth rolling 29" wheels with 2.3" Ground Control tires offer ample traction in every situation, SRAM disc brakes deliver substantial braking bite, 110 mm of front suspension travel smooths the trail, and a dropper seatpost is there for when you need to really get down in technical off-road situations.
- Turbo System Lock Use the Mission Control app to disable your bike's motor and activate the motion sensor alarm. Once locked, the motor cannot be enabled again except by the owner.
- Fender, Rack, and Kickstand mounts. Rated to pull a thru-axle trailer. Child seat compatible.

TURBO TERO 4.0 STEP-THROUGH EQ

Redwood / Black

Black / Black

The new Turbo Tero is an electric mountain bike equipped for everyday rides. A mountain bike that you can commute on. A commuter you can take touring. A touring bike that you can haul freight with. Whatever you need it to be, for wherever you want to go. A true do-it-all superhero, Tero combines adaptable utility with World Champion mountain bike DNA and category-leading electric pedal assist.

- Turbo Full Power 2.0 Motor and 710 Wh Battery- Integrated into the aluminum frame
 of the Tero 4.0, they effectively quadruple your own power, cranking out ample
 wattage to make short work of the steepest climbs and providing enough extra
 muscle to let you carry a mountain of adventure gear, groceries, kids and daydreams
 without breaking a sweat. It's you, only faster. But what really sets this motor apart
 from the rest is how efficiently and seamlessly it melds with your own efforts.
- Mission Control and MasterMind- Mission Control allows you to tailor Tero's power output levels to your desired preference-all three standard power modes can be almost infinitely adjusted to suit your power and range needs. MasterMind's MicroTune function can adjust power output levels in 10% increments so that you can tune the range to suit your needs.
- Mountain Bike DNA- Tero's componentry is tailored to enhance control and confidence. Aggressive but smooth rolling 29" wheels with 2.3" Ground Control tires offer ample traction in every situation, SRAM disc brakes deliver substantial braking bite, 110 mm of front suspension travel smooths the trail, and a dropper seatpost is there for when you need to really get down in technical off-road situations.
- Turbo System Lock Use the Mission Control app to disable your bike's motor and activate the motion sensor alarm. Once locked, the motor cannot be enabled again except by the owner.
- Equipped with DRYTECH Fenders, LED front and rear lights, and 27kg capacity rear HD Rack. The rear rack is compatible with child bike seats, and the bike is rated to pull a thru-axle trailer.
